

**Sac & Fox Tribe Brownfield Program
Quarterly Report**

Mike Kelley
Environmental Technician
December 3rd, 2007

Susan Klein
Brownfield Coordinator
Region 7 EPA

Sac and Fox Nation Environmental Department
Brownfield Program report

Summary of Activities, Brownfield Section
09/01/07 to 11/30/07

During the time period noted above, the .5 FTE brownfield technician was to: Prepare an RFP and/or RFQ and start the process for hiring a contractor and publish a public record and notice of accessibility.

On the dates of November 5th to November 7th the brownfield technician traveled to Kansas City for the Region 7 QAPP training at EPA. The technician was able to learn about writing and implementing a solid quality assurance plan.

In order to inform the public about the tribe's environmental brownfield inventory, the brownfield database posted on our departmental website. The technician also prepared to include the brownfield inventory in the tribal newsletter, which was to be mailed out over this time period. Due to staff turnover, the newsletter has yet to be finalized.

As previously stated the technician was to prepare an RFP and/or RFQ and start the process for hiring a contractor. The original contractor the tribe had wanted to use went out of business. The tribe is currently preparing to solicit bids for the hiring of a new contracting firm.
